BRYAN K. MIGNONE

Bryan Mignone is a senior policy advisor in the Office of Policy & International Affairs at the U.S. Department of Energy (DOE). In this role, he leads a domestic policy team and advises senior leadership on a wide range of climate change and energy policy issues. Since arriving at DOE in 2009, Mignone has worked to bolster the economic and quantitative analysis capabilities of the Policy Office, overseeing a research portfolio spanning climate change impacts, adaptation and mitigation. He has contributed to several specific activities and reports, including the U.S. Government's first social cost of carbon estimates, the President's clean energy standard proposal and DOE's report on electric system resource adequacy implications of air quality regulations, among others. Mignone previously served as professional staff on the U.S. Senate Committee on Energy and Natural Resources and as a fellow and research director at the Brookings Institution, where he focused on market-based environmental policy design and other climate and energy policy topics. Mignone was awarded a Ph.D. in geosciences from Princeton University, a graduate certificate in science, technology and environmental policy from the Woodrow Wilson School of Public and International Affairs, and an A.B. in physics and philosophy from Cornell University.
